ACKNOWLEDGMENTS

This report was prepared jointly by the Bureau of the Census and the Office of Revenue Sharing. In the Office of Revenue Sharing, general supervision was provided by Kent Peterson, assisted by Matthew Butler, Dana Curry, John McGuire, and Barbara Schwartz.

In the Bureau of the Census general supervision was provided by John R. Coleman, assisted by James J. Hogan, Gerard T. Keffer, Robert H. McArthur, and Margaret H. Wilson. Data were collected under the supervision of Kenneth E. Anderson, Ulvey Harris, and Howard Sales. Maurice Criz, senior advisor, was responsible for text review.

Computer programming was directed at the Bureau of the Census by Judith Jennings, assisted by Robert Bloomberg and Geneva Hines. Computer operations were carried out by Computer Services Divisions.

Publication copy was prepared at the Bureau of the Census under the supervision of Corrine Davis, Governments Division. Publications Services Division provided advice and services in the preparation of copy for publication.

The cooperation of State and local officials in providing information for this report is gratefully acknowledged.

INTRODUCTION

The State and Local Fiscal Assistance Act of 1972 as amended (General Revenue Sharing)¹ and regulations promulgated under title II of the Public Works Employment Act of 1976 as amended (Antirecession Fiscal Assistance)² require each State and local government which receives funds to supply certain information on its annual fiscal transactions, including data on the expenditure of funds received through either of these programs. This report presents these data aggregated by type of government according to demographic, geographic, and socio-economic variables. In addition, individual government data are presented for all States, for the 63 largest counties, and for the 46 largest municipalities.

The local government data presented in this volume pertain to the local fiscal year which ended between July 1, 1976 and June 30, 1977 (mostly on December 31, 1976 or June 30, 1977). For States, the applicable fiscal year ending date is June 30, 1977, with the exceptions of Alabama (September 30, 1977), Michigan (September 30, 1977), New York (March 31, 1977), and Texas (August 31, 1977).

Allocation and Distribution of Funds

General Revenue Sharing (GRS) funds are distributed to more than 38,000 general purpose governments, Indian Tribes, and Alaskan Native Villages at quarterly intervals. For fiscal 1976-77, the total allocations amounted to \$6,655.4 million distributed on the basis of inter-State and intra-State formulas. Primary determining factors in the formulas include population, per capita income, and general tax effort of recipient governments.

A local government's tax effort has a direct positive effect on the GRS allocations to that government, within lower and upper per capita grant limits. The tax effort factor of a local government is the amount of adjusted taxes³ divided by the aggregate personal money income of the population served by the recipient government. For a State, the tax effort factor is the total of State and local taxes relative to the State's aggregate personal income. For 1976-77, all States had a factor of 0.05 or above, that is, all States had total State and local taxes of \$50 or more per \$1,000 of personal income.

Due to the size of the tax base and the often limited range of functional responsibilities, 66 percent of all townships fall in the lowest tax effort factor category. Table A shows the

percentage distribution of the various types of local governments by their 1976-77 tax effort factors.⁴

Table A. Percentage Distribution of Governments by Tax Effort Factors: 1976-77

Type of Government	0.0500+	0.0300 to 0.0499	0.0200 to 0.0299	0.0100 to 0.0199	0.0000 to 0.0099
States	100.0	-	-	-	-
Local	1.8	4.4	9.9	28.9	55.1
Counties	1.9	6.2	13.3	39.0	39.7
Municipalities .	2.0	4.1	11.4	34.9	47.7
Townships . . .	1.5	4.5	7.5	20.3	66.2

Because of the tax effort factor, allocations of GRS funds to local governments are concentrated in those localities with large populations and high adjusted taxes. For 1976-77, more than 38,700 local governments were eligible to receive funds, yet approximately 42 percent of the allocations went to 199 local governments with populations over 250,000. The 19,391 local governments with below 1,000 population received less than 2 percent of all GRS allocations to local governments in 1976-77.

The Antirecession Fiscal Assistance (ARFA) program, initiated in 1976 as part of an economic stimulus program and discontinued in the latter part of 1978, was targeted to State and local governments, Indian Tribes, and Alaskan Native Villages which had high levels of unemployment. The United States territories (American Samoa, Guam, Puerto Rico, and the Virgin Islands) shared 1 percent of the total ARFA distribution, based on population. The distribution of ARFA funds to other recipients was determined by the seasonally adjusted national unemployment rate, the individual State, local, tribal, or native village unemployment rate (in excess of 4.5 percent), and the individual government, tribal, or native village GRS allocation. During the course of the program, ARFA funds were provided to more than 25,000 State and local governments, Indian tribes, native villages, and territories.

Payments for the first two quarters under the ARFA program were made in November 1976. By that date the fiscal period covered by this report had already ended for many local governments. For other governments, the fiscal year was in

¹ Public Law 92-512 as amended by Public Law 94-488.

² Public Law 94-369 as amended by Public Law 95-30.

³ Total local tax revenues net of any taxes allocated for education.

⁴ Distributions to Indian Tribes and Alaskan Native Villages are not presented in text tables.

progress. As a result, most governments received and expended fewer than four quarterly ARFA payments during the fiscal year covered.

Recipients of ARFA funds were required by law to spend, appropriate, or obligate funds within six months from the day following the receipt of the funds. GRS funds are required to be used, obligated, or appropriated within 24 months from the end of the entitlement period to which the entitlement payment is applicable.

Under both fiscal assistance programs, State governments received one-third of the total appropriations, with the remaining two-thirds being distributed to local governments.

The 1976-77 distribution of GRS and ARFA funds by type of receiving government is presented in table B.

Table B. GRS and ARFA Funds by Type of Government: 1976-77

(Dollar amounts in millions)

Type of government	GRS		ARFA	
	Amount	Percent of general revenue ¹	Amount	Percent of general revenue ¹
State governments . . .	2,266.1	1.33	375.9	0.22
Counties	1,671.3	4.03	168.3	0.41
Municipalities	2,384.5	3.92	350.8	0.58
Townships	333.4	5.09	33.7	0.51

¹ General Revenue comprises all the revenues of a government except utility, liquor store, and insurance trust revenues.

It should be noted that "general revenue" as described in table B includes revenues from the State and Federal governments that are legally earmarked for specific purposes, e.g., categorical grants received for education, highway construction, welfare, etc. A comparison of GRS and ARFA revenues with other general revenues available for the governments' discretionary use would result in substantially higher percentages being indicated for each type of local government.

Expenditures From GRS and ARFA Funds

Under the amended Act, there is no stipulation restricting the use of GRS funds to specific functional categories or purposes. Furthermore, shared revenue can be used for either current or for capital purposes. ARFA funds, on the other hand, can be used only for the maintenance of basic services customarily provided to persons by the recipient government. After July 1, 1977, use of ARFA funds for the acquisition of supplies and materials or for construction has not been permitted, except for normal supplies and repairs which are necessary to maintain basic services.

For 1976-77, State and local governments reported \$6,554.7 million of GRS expenditures, and \$707.5 million of ARFA expenditures. Table C summarizes the functional distribution of such expenditures. It is important to note that expenditures of GRS and ARFA funds are those amounts specified by State and local officials as being expended for the designated purposes. (See section on sources and limitations of data on page 7 for a discussion of the substitution of funds issue.)

Table C. Expenditure of GRS and ARFA Funds by Function: 1976-77

(Dollar amounts in thousands)

Function	GRS		ARFA	
	Amount	Percent	Amount	Percent
Total	6,554,694	100.0	707,545	100.0
Airports	7,963	0.1	436	0.1
Correction	166,652	2.5	62,312	8.8
Education	1,248,437	19.0	99,318	14.0
Financial and general administration	327,675	5.0	68,127	9.6
Fire protection	523,467	8.0	24,545	3.5
General public buildings	261,719	4.0	9,808	1.4
Health	476,732	7.3	31,737	4.5
Highways	799,024	12.2	47,172	6.7
Hospitals	138,542	2.1	46,387	6.6
Housing and urban renewal	17,627	0.3	3,049	0.4
Interest on general debt	55,811	0.9	22,592	3.2
Libraries	79,722	1.2	1,829	0.3
Natural resources	27,455	0.4	17,723	2.5
Parks and recreation	247,588	3.8	14,768	2.1
Police protection	942,809	14.4	80,475	11.4
Public welfare	165,699	2.5	99,562	14.1
Redemption of debt	90,214	1.4	6,408	0.9
Sanitation other than sewerage	292,096	4.5	9,970	1.4
Sewerage	78,781	1.2	3,543	0.5
Utility systems	79,281	1.2	6,938	1.0
All other	527,400	8.0	50,846	7.2

Reported data suggest that 22.4 percent of GRS expenditures during the period went to public safety activities (fire and police protection services). However, the largest single category was education.

Approximately 40 percent of all reported ARFA expenditures were for public welfare, education, and police protection. The restriction limiting the use of ARFA to basic services, and the fact that ARFA funds are available only to those governments with excessive unemployment, may have resulted in a relatively more concentrated use of funds for public welfare and other comparatively labor-intensive functional categories.

Expenditures by character

Over 73 percent of total GRS expenditures reported by more than 38,000 State and local government units in 1976-77 were for current expenses. Approximately 25 percent of all GRS expenditures were capital outlays. The remaining 1.4 percent of GRS funds were expended for debt redemption. As indicated by table D, expenditures of ARFA funds in 1976-77 were almost entirely for current purposes.

About 52 percent of the State governments' GRS current expenditures (equivalent to 43.8 percent of all State governments' GRS expenditures) were intergovernmental payments made to local governments. Intergovernmental expenditures accounted for about 25 percent of State governments' current expenditures from ARFA funds.

Intergovernmental expenditures of GRS funds by State governments in 1976-77 were mainly for education, accounting

for 86 percent of the \$909 million total, while 63.6 percent of State governments' intergovernmental expenditures of ARFA were for public welfare.

Table E illustrates that reported GRS and ARFA fund expenditures on functional categories varied substantially among different types of governments. State governments spent over \$1.2 billion of GRS funds for education, with about 65 percent of this amount in the form of payments to local governments. Local governments, with the major exception of New York City, tended not to use their GRS or ARFA funds for education. A large proportion of township GRS and ARFA funds was spent on road maintenance and construction, which is the primary function of townships in many States. Counties spent GRS funds heavily on highways, health and hospitals, and police protection. County ARFA expenditures were greatest for financial and general administration, followed by health and hospitals, public welfare, and police. Among local governments, regional differences in GRS and ARFA uses (see tables 28 through 37) are accentuated for counties, due in part to regional differences in scope and structure of county governments. For example, over 50 percent of county GRS and ARFA expenditures for roads and highways were made by counties in the South, where road construction and maintenance are major county responsibilities in several States. California counties account for 45.3 percent of GRS and 85.9 percent of ARFA expenditures by counties for the health and hospital functions. California counties also reported more than 50 percent of all county ARFA use for financial and general administration and more than three-fourths of county ARFA expenditures for public welfare. California counties weigh heavily on the ARFA expenditure data generally, accounting for 47.6 percent of all ARFA expenditures by counties.

Table D. Percentage of Expenditure of GRS and ARFA Funds by Character and Level of Government: 1976-77

Level of government	GRS			ARFA		
	Current	Capital	Debt redemption	Current	Capital	Debt redemption
State and local.	73.4	25.2	1.4	96.5	2.6	0.9
State ¹	84.7	15.2	0.1	98.3	0.5	1.2
Local	68.2	29.9	2.0	95.1	4.2	0.7

¹ State GRS and ARFA expenditure totals do not include those amounts transferred to State-administered retirement systems.

Table E. Percentage Distribution of GRS and ARFA Expenditures for Selected Functions, by Type of Government: 1976-77

Function	GRS				ARFA			
	States	Counties	Municipalities	Townships	States	Counties	Municipalities	Townships
Education	58.3	2.0	0.1	0.2	12.8	2.2	¹ 21.3	2.0
Financial and general administration	3.8	9.6	3.1	2.5	3.1	22.4	12.1	7.4
Fire protection	-	2.0	18.9	11.4	-	1.4	7.9	8.7
Health and hospitals	12.4	16.3	2.8	1.6	17.7	19.7	0.6	1.0
Highways	6.3	16.7	11.7	29.2	2.9	9.1	7.6	37.4

Public welfare	2.3	5.3	0.8	1.7	22.7	13.3	5.5	0.5

¹ New York City was responsible for 89 percent of municipal education expenditures from ARFA.

Tabular Presentation of General Revenue Sharing and Antirecession Fiscal Assistance Data

The type and structure of government, along with numerous demographic and socio-economic factors, influence the fiscal needs and functional responsibilities of governments. The allocation and uses of GRS and ARFA funds are also affected by such factors, as the tables in this volume demonstrate.

Table 1 provides a background for the GRS and ARFA data in this report by furnishing an historical summary of State and local government revenues, including allocations received under the two programs. In table 2 the portion of governmental revenues comprised of taxes is summarized for the same period with data aggregated for each State by level of government.

Detailed GRS and ARFA allocation data are displayed in several tables. Table 3 provides information on total GRS allocations for each State, by type of receiving government. Tables 4 and 5 show GRS and ARFA allocations as a percent of total revenue, by type of government. Further analysis of these data is provided in tables 6 and 7, which group the government types into population size classes, and in table 19, which displays the allocation data individually for the largest cities and counties.

On the expenditure side, proposed and actual GRS fund expenditure totals and actual ARFA fund totals are presented in tables 8 and 15, respectively. The proposed expenditures are the amounts recipient governments budgeted to spend during the period from their GRS funds. Actual expenditures figures represent the amounts of GRS and ARFA funds expended or obligated during the year. Expenditure amounts are shown for selected functions by type of government in each State. These GRS and ARFA expenditure amounts are presented as a percent of total expenditure in tables 9 and 16, respectively.

Tables 10, 11, 12, and 26 provide a population size class and functional distribution of GRS expenditures for counties, municipalities, townships, and Indian Tribes and Alaskan Native Villages, respectively. Tables 20, 21, 22, and 27 provide similar information about ARFA expenditures. A functional distribution of GRS and ARFA expenditures by the States appears in table 14.

Individual government GRS and ARFA expenditure data are shown for the 109 largest counties and cities in tables 13, 17, 18, and 23. GRS and ARFA expenditures as a percent of total expenditures are displayed for these large local governments in tables 13 and 23, respectively. A functional display of GRS and ARFA use data is furnished for the large counties individually in table 17 and for the large cities in table 18.

In table 24, numbers of local governments, by type of government and population size class, are displayed according to

the proportionate use of GRS funds by these governments in selected expenditure categories. In the same format, table 25 presents an analysis of the use of ARFA funds in selected expenditure categories.

Tables 28 through 85 display GRS and ARFA expenditure data by grouping the types of governments according to certain common characteristics. The general format of these tables is seen in the following example extracted from table 38:

Table F. Local Government Expenditures From General Revenue Sharing Funds, by SMSA and Non-SMSA Category and Function: 1976-77

1976-77

Item	All local governments	Local Governments	
		Inside SMSA	Outside SMSA
	Amount (thousands of dollars)		
Number of local governments	38,734	11,069	27,665
Total	4,478,138	3,320,300	1,157,838
Airports	7,711	4,443	3,268
Correction	112,330	89,962	22,368
Education	38,648	12,113	26,535
	5	5	5
Sanitation other than sewerage	292,096	236,162	55,934
Utility systems	79,281	55,554	23,727
All other	331,214	209,252	121,962
	Percent of the total expenditure for the function		
Total	3.5	3.2	4.6
Airports	0.9	0.6	3.7
Correction	6.9	6.4	10.3
Education	0.2	0.1	0.8
	5	5	5
Sanitation other than sewerage	11.5	11.4	11.6
Utility systems	0.6	0.6	0.9
All other	2.2	1.8	3.7

The display of proportions of total expenditures represented by GRS and ARFA funds provides a measure of the significance of GRS and ARFA expenditures reported for each function. It also provides an indication of the relative importance of the function for the group of governments under study.

In tables 28 through 85, governments are grouped according to regional location, location inside or outside a Standard Metropolitan Statistical Area (SMSA) in 1977, population change between 1970 and 1975, 1975 per capita income, 1977 unemployment rate, and minority population proportion in 1970.

Regional distribution (tables 28 through 37)

In these tables, State and local governments are grouped according to location in one of the following regions: Northeast, North Central, South, and West. The regions are defined below.

Northeast	North Central	South		West
Connecticut Maine Massachusetts New Hampshire New Jersey New York Pennsylvania Rhode Island Vermont	Illinois Indiana Iowa Kansas Michigan Minnesota Missouri Nebraska North Dakota Ohio South Dakota Wisconsin	Alabama Arkansas Delaware District of Columbia Florida Georgia Kentucky Louisiana	Maryland Mississippi North Carolina Oklahoma South Carolina Tennessee Texas Virginia West Virginia	Alaska Arizona California Colorado Hawaii Idaho Montana Nevada New Mexico Oregon Utah Washington Wyoming

Table G. Percentage Distribution of GRS and ARFA Expenditures by Local Governments, by Region, for Selected Functions: 1976-77

Function	GRS				ARFA			
	North-east	North Central	South	West	North-east	North Central	South	West
Education	0.2	0.1	2.5	0.1	29.9	-	11.3	-
Fire protection	17.5	9.1	9.7	10.4	5.2	8.0	8.0	5.8
Health and hospitals	5.5	6.6	5.4	17.7	0.7	2.3	2.4	18.1
Highways	10.2	18.8	18.9	9.9	6.9	10.8	14.7	10.6
Police protection	31.7	20.5	15.5	16.1	15.3	43.2	19.3	15.9
Public welfare	3.3	2.7	2.0	2.7	9.6	1.0	0.7	10.6

Over 57 percent of all local governments receiving GRS funds are located in the North Central region, but these governments accounted for only about 24 percent of all GRS expenditures made by local governments in 1976-77. This is due to the concentration of small governments in the North Central region which contains over 70 percent of the 19,387 local governments that have a population (1975 estimate) of less than 1,000. The West region, with less than 7 percent of local government GRS recipients, accounts for approximately 19 percent of all GRS expenditures by local governments.

SMSA distribution (tables 38 through 45)

Each SMSA consists of a single county area or a group of contiguous counties, except that in New England such an area consists of a group of contiguous cities and towns. Each SMSA includes at least one "central city" of at least 50,000 inhabitants or — in some instances — contiguous cities or communities which together meet this population minimum. In 1977, there were 272 SMSA's inside the United States, containing over 72 percent of the population. Primarily because of their higher tax effort, these areas, which include less than 29 percent of all local governments, account for over 74 percent of all local GRS expenditures.

Population change distribution (tables 46 through 55)

These tables group governments according to the percent increase or decrease in population experienced between 1970 and 1975, based on the 1970 population census and on 1975 population estimates. Many of the largest cities are included in

the group of municipalities showing a moderate (less than 10 percent) population decrease. This group, representing roughly one-fourth of all municipalities, spent almost half of the GRS dollars expended by municipalities.

Per capita income distribution (tables 56 through 65)

Per capita income data used to produce these tables are the 1975 estimates published by the Census Bureau in *Current Population Reports*. Estimates are based on 1970 census data with adjustments for changes in income, population, and geographic boundaries.

Per capita income enters the GRS allocation formula (and, indirectly, the ARFA formula) as an indicator of the ability of governments to raise revenue and finance services. Holding constant all other components of the formula, the lower the per capita income of a locality, the higher will be its allocation, within the formula's per capita grant constraints.

For over 4,800 local governments having a 1975 per capita income of below \$3,000, GRS expenditures accounted for about 8 percent of total expenditures. The proportion of total expenditures accounted for by GRS expenditures is lower for local governments with higher 1975 per capita income.

Unemployment distribution (tables 66 through 75)

GRS allocations are determined independently of recipient governments' unemployment rates. ARFA allocations, however, varied directly with the unemployment rate of the recipient.

ARFA payments were authorized only if the national unemployment rate was over 6 percent, and the individual government's allocations (except those for a territory) were determined by its unemployment rate in excess of 4.5 percent, and by its GRS allocation.

According to the Bureau of Labor Statistics, the national civilian unemployment rate was 7 percent in 1977. Approximately 35 percent of all general purpose local governments had an unemployment rate above the national rate. Twenty-nine percent had an unemployment rate of 4.5 percent or less. ARFA grants to governments included in the latter category are explained by fluctuations in unemployment rates affecting ARFA eligibility from one quarter to the next.

Minority population distribution (tables 76 through 85)

These tables group governments according to percent of nonwhite residents in 1970, based on data from the population census. Only one State (Hawaii) and less than 2 percent of all local governments had a nonwhite population in excess of 50 percent. Approximately 88 percent of the local governments had minority populations of less than 10 percent, yet these governments accounted for only about 60 percent of all GRS and ARFA expenditures by local governments. Influencing this statistic is the relatively high concentration of small governments in regions with the lowest percentage of minority population.

GRS and ARFA Expenditures — Other Studies

Research studies on the fiscal impact of GRS indicate that although shared revenues are used for various functional activities, the actual impact on recipient governments' total expenditure may not be equal to the full amount of GRS funds spent.⁵ These studies attempt to differentiate between the "expenditure impact" and the "substitution impact" of GRS. GRS may add to total government spending when used to expand or maintain capital or operational programs. It may also be used to substitute for recipients' own source revenue and to stabilize or even reduce taxes and borrowing. The extent of these two major effects of GRS cannot be inferred from data presented in this volume alone.

Similarly, the ARFA expenditure data in this volume reflect the functional activities in which funds were expended, and do not indicate whether recipient governments used ARFA funds to substitute for their own source revenues or to add to total expenditures.

Fiscal impact studies have found a pattern of GRS uses over time.⁶ Initially, funds flow into surplus balances, and are drawn

down in subsequent periods. About 50 to 70 percent of GRS funds were found to be used to increase or maintain expenditures for programs that without GRS would be reduced or eliminated. Findings indicate that about 25 to 30 percent of GRS funds have been used to stabilize revenue and debt. Without GRS the needed funds would have to be raised from other sources.

The fiscal application of ARFA⁷ is estimated to be similar to that of GRS. It is estimated that ARFA funds have been used as follows: About 70 percent to increase expenditures, roughly 20 percent for tax abatement, and 10 percent to expand cash balances of funds from other sources.

The fiscal impact of GRS varies by the type of governments, by region, by size and by the fiscal condition of the recipients. In general, State governments use proportionately less GRS on capital expenditure; instead GRS funds are used to stabilize or reduce revenue from the State's own sources. For fiscal years 1974 and 1975, it is estimated that State governments transferred over 26 percent of their GRS funds to local governments. Use data reported in this volume for 1976-77 indicate a significantly higher percentage of intergovernmental expenditure use of GRS (44 percent).

In terms of GRS use by functional categories, fiscal impact studies⁸ found that State GRS funds have been used primarily for education, health and social service programs. Among the leading uses by municipalities are public safety, transportation, environmental protection, recreation and libraries. Public safety was also estimated to be a major use of ARFA funds by cities and counties. One study⁹ notes that survey estimates of program impact are different from local governments' typical use of public funds. A comparison of the percentage distribution of State and local direct general expenditures in 1976-77 for selected functions and the corresponding percentage distribution of State and local GRS and ARFA expenditures also suggests some difference between uses of fiscal assistance funds and other governmental revenues.

Table H. Percentage Distribution of GRS, ARFA, and Total Expenditures (Excluding Insurance Trust) for Selected Functions: 1976-77

Function	Total expenditures ¹	GRS	ARFA
Education	37.2	19.0	14.0
Fire Protection	1.1	8.0	3.5
Health and hospitals	6.4	9.4	11.0
Highways	7.1	12.2	6.7
Police	2.8	14.4	11.4
Public welfare	12.0	2.5	14.1

Sources and Limitations of Data

The data on expenditures of GRS and ARFA funds in this volume were reported by individual governments receiving such funds. Information was collected by the Bureau of the Census using three standard forms: One for State governments, one for municipalities and townships with over 2,500 population and all counties, and one for municipalities and townships with less than 2,500 population, and all Indian Tribes and Alaskan Native Villages. The surveyed governments were asked to categorize expenditures of GRS and ARFA according to Census Bureau definitions of functions as listed on the survey forms. Categorization, however, was subject to the interpretation of the State and local government official(s) in charge of completion of the form. Data are therefore subject to possible inaccuracies in classification and response.

In analyzing the expenditure impact of both GRS and ARFA, it is necessary to note certain caveats related to the use of the data presented herein. In terms of actual effect of GRS and ARFA spending, the expenditure of funds may have been substituted for recipients' expenditures from other sources of revenue. It is therefore not known whether expenditures on certain functions would have taken place in the absence of GRS and ARFA, financed via borrowing, by an increase in taxes and charges, or by elimination of one or more programs currently

receiving own source revenues. Compared to GRS expenditures, the uses of ARFA funds are more restricted by law, as mentioned earlier. The expenditure of ARFA funds in permitted categories may displace expenditures from recipient's own source revenue, freeing such for use in other functions.

While the total number of GRS recipient governments remained relatively constant, this was not the case for ARFA. Since ARFA payments were made only to individual governments with an unemployment rate in excess of 4.5 percent, the number of recipients varied from one quarter to another. Thus, the number of governments spending ARFA money in 1976-77 is larger than the number receiving ARFA money in any single quarter of the year.

Data should be used with caution when comparing the use of GRS and ARFA funds by the different types of governments. Though data are aggregated by type of governments — State governments, counties, municipalities and townships — the fiscal and functional responsibilities of each type vary from State to State. Any inter-State comparisons should therefore take into account such differences.

More detailed data on State and local government finances for 1976-77 are provided in the Census Bureau's Governmental Finances publication series.

DEFINITIONS OF SELECTED TERMS

Airports. Provision, operation, and support of airport facilities.

Antirecession Fiscal Assistance Funds Expenditure. Amounts of Antirecession Fiscal Assistance funds, and any interest earned on the investment of such funds, actually expended (or obligated) during the fiscal year.

Capital Expenditures. Outlays for construction and purchase of land, equipment, and existing structures.

Correction. Confinement and correction of adults and minors convicted of offenses against the law, and pardon, probation, and parole activities.

Current Expenditures. Salaries and wages, purchase of utilities, services and supplies, and all other expenditures exclusive of capital outlay and debt redemption.

Education. Any expenditures for education purposes.

Expenditure. All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for investment in securities, extension of credit, or as agency transactions. Expenditure includes only external transactions of a government and excludes noncash transactions such as the provision of perquisites or other payments in kind.

Financial and General Administration. Expenditures for financial administration and executive, legislative, and judicial operations of government.

Fire. All costs incurred for fire fighting and fire prevention, including contributions to volunteer fire units.

Fiscal Years. Annual Census Bureau figures on local government finances are for fiscal years ending in the twelve-month period through June 30, thus, the reporting period of 1976-77 includes local governmental fiscal years that ended between July 1, 1976 and June 30, 1977.

General Local Government Support. State intergovernmental payments that are unrestricted as to function or purpose, as distinguished from amounts allocated for specified purposes. Excludes aid to school districts and to single purpose special districts.

General Public Buildings. Construction, maintenance and operation of city hall or county courthouse and any other buildings not relating to particular purposes.

General Revenue. General revenue includes all revenue of a government except utility revenue, liquor stores revenue, and insurance trust revenue.

General Revenue Sharing Funds Expenditure. Amounts of General Revenue Sharing funds, and any interest earned on the investment of such funds, actually expended (or obligated) during the fiscal year.

General Revenue Sharing Funds Proposed Expenditure. Amounts of General Revenue Sharing funds, and any interest earned on the investment of such funds, that were budgeted to be spent during the fiscal year.

Health. All public health activities except provision of hospital care. Includes environmental health activities and all services performed directly by the public health department. Excludes any payments under public welfare programs.

Highways. Amounts for construction and maintenance of streets, sidewalks, bridges, and toll facilities. Includes street lighting, snow removal, and highway engineering, but excludes street cleaning expenditure.

Hospitals. Expenditure for construction and operation of hospitals, including payments to hospitals operated privately. Excludes nursing homes.

Housing and Urban Renewal. Expenditures for urban renewal, slum clearance, housing projects, and similar activities.

Insurance Trust System. A government-administered program for employee retirement and social insurance protection relating to unemployment compensation, workmen's compensation, Old Age, Survivors', Disability, and Health Insurance, and the like.

Interest on General Debt. Amounts of interest paid on all debt except utility system debt.

Intergovernmental Expenditures. Payments by State governments to counties, municipalities, towns, school districts, or special districts. (Intergovernmental expenditures by local governments are not analyzed in this report. Such payments are included in current expenditures amounts.)

Intergovernmental Revenue. Includes grants, shared taxes, and contingent loans and advances for support of particular functions or for general financial support, any significant and identifiable amounts received from other governments as reimbursement for performance of governmental functions, and

any other form of revenue representing the sharing by other governments in the financing of the activities of the receiving government. Excludes loans (other than those of a contingent nature) and amounts received from the sale of property, commodities, or utility services to other governments.

Libraries. Provision and support of public library facilities and services.

Liquor Stores Revenue. Liquor stores revenue consists of gross amounts received from sales made by liquor stores owned and operated by State or local governments, exclusive of any distinctive tax revenue they may collect.

Natural Resources. Activities to conserve, promote, and develop natural resources of soil, water, forests, minerals, wildlife, etc.

Parks and Recreation. Expenditures for playgrounds, golf courses, swimming pools, museums, marinas, community music, drama, and celebrations.

Police. Amounts for law enforcement and related activities of government, including coroners and medical examiners, and special police forces with general arrest powers. Includes vehicular inspection and traffic control and safety activities, but excludes highway engineering and planning.

Protective Inspection. Regulation of private enterprise for the protection of the public, and inspection of hazardous activities.

Public Welfare. Expenditures for public assistance programs including administration costs, vendor payments, and direct payments to indigents. Includes medical, hospital, and nursing home care provided to the needy.

Redemption of Debt. Amounts of principal paid for the retirement of short-term or long-term bonded indebtedness.

Sanitation Other Than Sewerage. Amounts for facilities and services incident to keeping streets, alleys, and sidewalks clean, and collection and disposal of garbage, ashes, refuse, and other waste. Amounts for snow and ice removal are included in "highways".

Sewerage. Expenditures for sewers and sewage disposal facilities, including intergovernmental payments for such services. For combined water supply and sewage disposal systems, segregable expenditure relating to sewage disposal is also included.

Utility expenditure. Gross expenditure for a water supply, electric light and power, gas supply, or transit system owned and operated by the government. Includes interest payments on utility debts.

Utility Revenue. Receipts from the sale of utility services or commodities to the public or to other governments.

Water Transport. Provision, operation, and support of canals and other waterways, harbors, docks, wharves, piers, and related terminal facilities.
